# Java Senior Software Engineer - (M/F)

Ref.<sup>a</sup> T202106

Our client provides advanced design solutions and turnkey software systems for the Space industry. Based on a solid team of highly motivated and specialized engineers, the company is today a reference in the European Space sector. The company focuses on the design of systems for Space and the development and validation of operational software systems, in the areas of Global Satellite Navigation Systems (GNSS) Technologies, Mission Analysis, System Engineering, Guidance, Navigation and Control (GNC), Attitude and Orbit Control Systems (AOCS), Ground Segment Systems, On board Software Systems and Information Systems.

The company is hiring a Senior Software Engineer, having as main objective the development of JAVA software to be used for high demanding Earth Observation Data Processing applications.

**Location:** Lisbon, Portugal

## Main Accountabilities:

- Design and implement JAVA software to be used in space payloads operational processors.
- Lead the implementation and validation of the instrument operational processor and its integration.
- Coordinate and guide the work of other team members.
- Interact with the customer for specification, design, development, validation and maintenance of the data processing system under his/her responsibility. This includes holding meetings in other European countries.
- Periodically report the technical status to the project manager and contribute in a proactive and resolute manner to the success of the project.

## Requirements & Qualifications:

- Degree in Software Engineering.
- Required at least 5 years of experience in development of complex SW systems.
- Previous experience in EO domain shall be considered an asset.
- Experience in Java programming.
- Experience in agile software development.
- Experience in JAVA based web-services: JSON, REST (...)
- Fluent English, both written and spoken.

If you meet the above requirements, please send your application via email: [careers@qsr.consulting](mailto:careers@qsr.consulting) with reference to T202106\_PRO\_Senior Software Engineer

- 
- Team player with good communication skills.
  - Motivation in developing innovative software.

**Offer:**

- Wage package appropriate to the presented experience.
- Career development opportunity.
- Contractual link established directly with the client.
- Work in highly innovative projects with ESA (European Space Agency).
